#### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/2007 has been entered.

It is noted that applicant did not provide any response to final Office action of 06/27/2007. The RCE request is filed with an Information Disclosure Statement. Therefore, the preceding Office action is re-iterated, along with comments on IDS.

#### ***Status of the claims***

Claims 25-36 are pending.

#### ***Information Disclosure Statement***

Applicants' Information Disclosure Statement filed 10/31/2007 has been received and entered into the application. Accordingly, as reflected by the attached completed copies of forms PTO-1449, the cited references have been considered.

Art Unit: 1631

Note, however, that the citations in with strikethrough in the IDS are not in proper format as they are either missing a publication year or part of citation. Correction is requested.

### ***Claim Objections***

Claims 26,27 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. The base claim 25 is limited to particular sequences of substance P analogs, SEQ ID Nos. 1 and 2. Claims 26,27, however, are broader, as they address analogs comprising (rather than consisting of) SEQ ID No. 1 or 2. Applicant is required to cancel the claims, or amend the claims to place the claims in proper dependent form, or rewrite the claims in independent form.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1631

Claims 25-29,35,36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3,6-8 of U.S. Patent No.6063758. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '758 are directed to conjugates comprising Substance P analogs, such as the instant SEQ ID No.1 and 2 and saporin.

Claims 25-28, 30-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 4,5,9 of U.S. Patent No.6063758. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '758 are directed to conjugates comprising Substance P and a ribosome-inactivating proteins, such as ricin A chain, gelonin, pokeweed antiviral protein, diphtheria toxin or pseudomonas aeruginosa toxin. With respect to analogs of Substance P, such as the instant SEQ ID No.1 and 2, it would be obvious to use analogs of substance P having the same functional activity to be used in conjugates as claimed as being functional equivalents.

This is a RCE of applicant's earlier Application No. 10/813856. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL**

Art Unit: 1631

even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.
